EDUCATIONAL BACKGROUND

Thapar Institute of Engineering and Technology
Bachelor's Degree in **Computer Engineering**,
Elective focus on Robotics and Edge AI(Nvidia)
2019-2023
C.G.PA. - 9.30

SKILLS & PROFICIENCIES

- Python, C/C++, SQL, Machine Learning, Computer Vision, TensorFlow, PyTorch

WORK HISTORY

- **AI Engineering Intern @ Mercer Mettl**
  Jan 2023 to June 2023

Working on a project related to unsupervised id card recognition.

- **Research Intern @ Carnegie Mellon University**
  September *2021 to Present*

Currently working on a project related to finding mutational signatures in the cancer genome.
Worked on a project on data augmentation technique based on game theory and adversarial machine learning.

- **Research Intern @ IIIT-Hyderabad**
  May 2022 to June 2022

*Worked on developing **GAN architecture that supports pairwise similarity dataset**, along with thorough analysis for making machine learning models robust against adversarial attacks*

- **R&D Prism Intern @ Samsung - SRIB**
  May 2021 to November 2021

Developed real-time h**and gesture recognition system** on custom collected dataset with an accuracy of 98%, 30+ FPS and deployed our model on an Android app.

- **Research Intern @ Moonplexus**
  August *2021 to February 2022*

*Developed an **obstacle identification, detection and localization model** for vehicles with an accuracy of 97%*

- ***Virtual Intern @ Microsoft(Future Ready Talent)***
  September 2021 to February 2022

*Developed and deployed a website on Microsoft Azure Platform for **sentiment analysis and language translation***

- ***Undergraduate Researcher @ Thapar University***
  March 2021 - June 2021

Worked on Precision Agriculture based project on developing **plant disease and weed detection system**, while experimenting with it in real farm with our self-created datasets from either sensors or remote sensing.

- **Computer vision and IOT Intern @ The Sparks Foundation**
  January 2021 - February 2021

Developed an **object detection model** for detecting a variety of objects with an accuracy of 97%.

- **Machine Learning Intern @ Verzeo**
  January 2020 - February 2020

Worked on projects related to **data analysis** on a list of details of apps and about applying machine learning and data analysis skills for **fraud detection**.

VOLUNTEER WORK / OTHER ROLES

Federation of Indian Animal Protection Organisations - Member
Worked as animal rights activist by spreading awareness and helping animals in need.
National Service Scheme - NSS, TIET - Member
Took part in Young Warrior program by UNICEF, helped organize blood donation camp, and tree plantation initiative, and wrote essay for National Youth Festival

PROJECTS

- **EGRET : A System to help neutralize the Enemy Target for Surveillance Application**
  Developed adversarially robust weapon classification model along with real time weapon detection model and a face detection and recognition system.
- **Identifying trending products on Flipkart** by extracting trend from social media like Instagram, etc, and other shopping websites, and using keyword generation to search for optimal information.
- **Language Translation and Sentiment Analysis website**
  Developed and deployed a website on Microsoft Azure. This project uses Microsoft Azure Language Service, Translator Service and azure Web App service, with support for 20 different languages

AWARDS AND ACHIEVEMENTS

- Secured a top 10 rank nationally, and 1st in my college in Geoffrey Hinton Fellowship Hackathon
- Flipkart GRID Hackathon pre-finalist
- Received **merit based scholarship** at Thapar University for excellent academic performance.
- Received Shri Govind Hari Singhania Ji Scholarship Award from Sir Padampat Singhania Education Center for being among the Top 5 performers from the school securing 96.4% in AISSCE (Class 12) and 10/10 C.G.P.A. (Class 10)

CERTIFICATIONS

- Automatic Speech Recognition – Samsung
- Game Theory I and II from Kevin Leyton-Brown
- DeepLearning.AI TensorFlow Developer Specialization
- Generative Adversarial Networks (GANs) Specialization
- Natural Language Processing with Classification and Vector Spaces (Coursera)
- Fundamentals of Reinforcement Learning (Coursera)
- Introduction to Deep Learning (Coursera)
- Artificial Intelligence with Python (Udacity)

OTHER ROLES

- Member - MUST Research Club
- **Campus Coordinator - National Engineering Olympiad**
  Formed a large student community and interacted with several students for promoting National Engineering Olympiad and participating in the same.
- **Member of Student Consultative Committee – Thapar University**
  My work was to analyze the problems faced by the students and also to conduct a survey based on which we had to tell the university authorities what problems students were facing, and we had to meet with the university deans and other officials every semester to report our observations.

Google Developer Club Thapar - Core Member
Organized hackathons, events, and sessions on different domains of computer science
